Sothis/Sopdet (Ancient

The Peyton was created using the glyph for Sirius found in Agrippa's *Second Book of Occult Philosophy*; attributed to Hermes Trismegistus. For use in this rite the Egyptian symbol for Sirius/Sopdet was added as well as the astrological glyphs of Aries, Neptune and Saturn within the egg of the first time-the beginning of the cosmos.

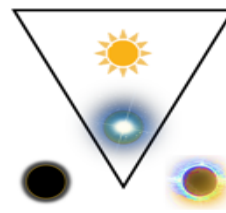

The opposite side of the Peyton contains one of the four alchemical states of Being

Give heed to whatever symbol was gifted to you in random selection as you crossed the threshold of liminal space. These are energetic initiators that allow for return through each of the Gates of the Sun, as the user empowers the specific element within themselves that holds the keys. This is not to say that these Gates may not be revitalized in use of any of the four alchemical elements; because as we know all of the elements contains portions -lesser and greater-of all within each.
